

GEOVOS WEATHER STATION

ONLINE LOCAL WEATHER MONITORING

a solution by :

FORTUNA
ARGATECH

The weather data becomes important in wide range of business and industries. The forecast data can help in decision making related in productivity in mines, plantations, manufacturing, and more.

Argatech Weather Station (Hyper Local Weather Station) is an online weather monitoring system that provides data of humidity, temperature, rainfall, wind speed, wind direction and UV level all in realtime mode and record it in a database to forecast the local weather.
